▼ data * any
  ▼ allOf[0] LimitOrderV4Data object
    makerAsset * string
    takerAsset * string
    maker * string
    receiver string
    makingAmount * string
    takingAmount * string
    salt * string
    extension string
    makerTraits string
  makerRate * string
  takerRate * string
  isMakerContract * boolean
  orderInvalidReason * string
```

## Authorization - API KEY

API KEY

[Sign in](#) for automatic API key authentication.

Try it

NodeJS Python cURL Go

```
const axios = require("axios");

async function httpCall() {
  const url = "https://api.1inch.dev/orderbook/v4.0/1/order/{orderHash}";

  const config = {
    headers: undefined,
    params: {},
    paramsSerializer: {
      indexes: null,
    },
  };

  try {
    const response = await axios.get(url, config);
    console.log(response.data);
  } catch (error) {
    console.error(error);
  }
}
```

## Response

Click the try-it button to test your API call and see the real-time response right here.
