

# Introduction

## 1inch classic swap

The 1inch classic swap API (Pathfinder v6.1) is a cutting-edge discovery and routing algorithm that offers asset exchanges at the best rates on the market. Pathfinder finds the most efficient paths for a token swap and is able to split between different protocols and even different market depths in within one protocol in the shortest possible time.

### ! INFO

If you are an enterprise with significant trading volumes, [complete this application](#) so we can assign you a custom API endpoint. The enterprise endpoint will offer significantly better performance across market rates and response times.
