

# ApprovalPreInteraction

## Quick links

[Functions](#)[Errors](#)

## Functions

### constructor

```
constructor(address _immutableOwner, address _maker) public
```

### preInteraction

```
function preInteraction(struct IOrderMixin.Order order, bytes, bytes32, address, uint256 makingAmount, uint256, uint256, bytes) external
```

See {IPreInteraction-preInteraction}.

### isValidSignature

```
function isValidSignature(bytes32 orderHash, bytes signature) external view returns (bytes4)
```

Checks if orderHash signature was signed with real order maker.

## Errors

### UnauthorizedMaker

```
error UnauthorizedMaker()
```
