

Migration from v5.0 to v5.2

Following changes must be done to migrate from v5.0 to v5.2

Parameter change for /quote

Request

Renaming of parameter:

fromTokenAddress -> src

toTokenAddress -> dst

Added new parameter optional query params:

includeTokensInfo: boolean - Return fromToken and toToken info in response

includeProtocols: boolean - Return used swap protocols in response

includeGas: boolean - Return approximated gas in response

Response:

Renaming of parameter:

estimatedGas -> gas

toTokenAmount -> toAmount

Specialities:

By default only toAmount will be in the response. Additional parameter can be activated by additional parameters.

Parameter change for /swap

Request

Renaming of parameter:

fromTokenAddress -> src

toTokenAddress -> dst

fromAddress -> from

destReceiver -> receiver

referrerAddress -> referrer

compatibilityMode -> compatibility

Added new parameter optional query params:

includeTokensInfo: boolean - Return fromToken and toToken info in response

includeProtocols: boolean - Return used swap protocols in response

includeGas: boolean - Return approximated gas in response

Response:

Renaming of parameter:

toTokenAmount -> toAmount

Specialities:

By default only `toAmount` and `tx` will be in the response. Additional parameter can be activated by additional parameters.
