

# Swagger

Web3 RPC API

POST `https://api.1inch.dev/web3/{chainId}`

Perform RPC calls against full nodes

Performs JSON-RPC calls on the blockchain identified by the given chainId. The default nodeType will be used.

## Network

Ethereum

## Parameters

chainId `string` \* (path)

The unique identifier for the blockchain.

1

## Request Body

Content type

application/json

Click in to adjust the request body:

```
{
  "jsonrpc": "2.0",
  "method": "eth_blockNumber",
  "params": [],
  "id": 1
}
```

Request Body Schema:

- ▼ object
  - jsonrpc \* string
  - method \* string
- ▼ params array
  - items string
  - id integer,string,null

## swagger.response

Code: 200

JSON-RPC response

Schema:

- ▼ object
  - jsonrpc \* string
  - result string
  - id integer,string,null

Code: 400

Invalid request format

Code: 404

ChainId not found

## Authorization - API KEY

API KEY

[Sign in](#) for automatic API key authentication.

Try it

NodeJS   Python   cURL   Go

```
const axios = require("axios");

async function httpCall() {
  const url = "https://api.1inch.dev/web3/1";

  const config = {
    headers: undefined,
    params: {},
    paramsSerializer: {
      indexes: null,
    },
  };
  const body = {
    jsonrpc: "2.0",
```

```
method: "eth_blockNumber",
id: 1,
};

try {
  const response = await axios.post(url, body, config);
```

## Response

Click the try-it button to test your API call and see the real-time response right here.
