      ⌄  tags  *  array
            items  string
  ⌄  version  *  VersionDto  object
```

```
major  *  number
minor  *  number
patch  *  number
```

Authorization - API KEY

API KEY

for automatic API key authentication.

Try it

NodeJS   Python   cURL   Go

```javascript
const axios = require("axios");

async function httpCall() {
  const url = "https://api.1inch.dev/token/v1.3/multi-chain/token-list";

  const config = {
    headers: undefined,
    params: {
      provider: "1inch",
      country: "US",
    },
    paramsSerializer: {
      indexes: null,
    },
  };

  try {
    const response = await axios.get(url, config);
    console.log(response.data);
  } catch (error) {
```
